CONCEPT

The Asia-Europe Foundation (ASEF) is launching a review of the implementation experience of Asia-Europe Meeting (ASEM) countries on Sustainable Development Goal 12 (SDG12): Responsible Consumption and Production (RCP).

The study “Closing the loop: ASEM’s transition towards achieving a circular economy” provides a bird-eye view of how 51 ASEM member countries approach the implementation of SDG12 targets and integrate them into national strategies, target-setting, and monitoring activities.

In order to achieve the targets of SDG 12, the publication sets out five key messages for ASEM member countries to address the full production and consumption cycle of natural resources and support a circular economy transition. The five key messages suggested are listed below:

1. Importance of creating strong policies and legislative framework, as a backbone of a successful transition to a circular economy
2. Crucial role of businesses in systemic transformation
3. Essential place of green public procurement practices supporting circular economy
4. Education on RCP practices
5. Smart monitoring

PROGRAMME

11:00 – 11:15 Registration

11:15 – 11:25 Welcome remarks

Mr Sun XIANGYANG, Deputy Executive Director, Asia-Europe Foundation

11:25 – 12:00 Panel discussion
