About the Asia-Europe Environment Forum

Established in 2003, the Asia-Europe Environment Forum (ENVforum) is a partnership of the Asia-Europe Foundation (ASEF); ASEM SMEs Eco-Innovation Center (ASEIC); the Swedish International Development Agency (Sida) in cooperation with the Stockholm Environment Institute Asia (SEI); the Hanns Seidel Foundation (HSF); and the Institute for Global Environmental Strategies (IGES). During the first decade of its operation, the ENVforum organised over 50 high-level international meetings, roundtables, conferences and workshops, bringing together over 1,200 selected participants from government, ministries, academia, international organisations, NGOs and civil society and also authored seven prominent publications.

The ENVforum aims to foster inter-regional cooperation between Asia and Europe on sustainable development and its environmental dimensions. To support such collaboration, the ENVforum aims to provide a multi-stakeholder platform for knowledge-sharing, capacity building, to offer up-to-date information for policy makers and partner organisations on environmental themes, and to contribute to the formulation of sound political decisions that are mindful of their environmental impacts.

ASEF's contribution is made with the financial support of the European Union.

About the Hanns Seidel Foundation

“In the service of democracy, peace and development” – this is the motto that the Hanns Seidel Foundation (HSF) applies to its work and mission. The motto applies not only for its commitment in Germany, especially in Bavaria, but also abroad.

Based in Munich, Germany the HSF is a political foundation associated with the Christian Social Union (CSU). HSF has more than 35 years of experience in national civil education and international cooperation around the world and is divided into the following departments:

- Academy for Politics and Contemporary Events covers the fields of social and political research
- The educational association of HSF is responsible for socio-political education
- The grants committee offers scholarships to domestic and foreign students

Measures and projects in the field of development co-operation are undertaken by the Institute for International Cooperation (IIC). With the funds provided by the German federal government, HSF manages more than 90 technical assistance projects carried out in 70 countries.
